1085D

Cruz-Air

The 1085D has a 30' surface reach, an 18'-10" digging depth and 22' loading height. Add the optional Extenda-stick® and Wrist-O-Twist® to increase flexibility for working under and around obstacles.

The Badger 1085D offers superior performance both on and between job sites. The machine travels at 29mph, eliminating the need for a lowboy trailer for transport. Ninety-five percent gradeability provides fifty percent more off-road tractive effort. Combined with 16" ground clearance, full time 4-wheel drive and torque proportioning differentials, the 1085D boasts superior rough terrain performance.

**ON THE ROAD, OFF THE ROAD—
BREAKING NEW GROUND AND
WORKING HARDER THAN EVER.**

1085D CRUZ-AIR

The 1085D Cruz-Air is a state-of-the-art rubber-tired hydraulic excavator/material handler developed for efficient ditching and excavating. The 1085D travels on its own power without loading up on a lowboy trailer, making it ideal for municipalities and contractors markets that require quick and efficient movement between job sites. Made in the USA.

-  **Customize the 1085D to meet your working range requirements with a variety of boom and stick combinations, including auxiliary hydraulics, stick extension attachments, hydraulic thumb and many other combinations.**
-  **Equipped with rubber tires, the multi-use 1085D is incredibly versatile and can be transported to a job site on its own power, thus avoiding the use of an additional transport truck and trailer.**
-  **The Cummins turbo-charged engines provide the right power-to-weight ratio for long life and exceptional reliability, delivering fuel efficiency and powerful performance.**
-  **Machine controls are conveniently arranged, responsive, and ergonomically correct to ensure safe, easy oneman operation on or off the road, in a spacious and comfortable cab.**
-  **Long-life and easy to service hydraulic system offers you more up time. Dash mounted service indicators promote simple routine functions. Optional auxiliary hydraulics enable you to quickly install grapples, mowers, brush cutters, augers and thumbs to save you time and money while requiring only one machine.**

Hydraulic Thumb option adds the ability to easily pick up rocks, debris and stumps, plus flexibility for various material handling jobs.

Quick Attach option allows user to make attachment changes in minutes.

Wrist-O-Twist® option pivots attachment up to 45° in either direction.

Custom Built in America. For Today. For the Future.

Badger Equipment manufactures specialized earthmoving, railroad and material handling machinery, engineered for high performance to suit real-world working requirements. The Winona, Minnesota, company has built more than 10,000 units since 1945.
